Dear Mr. Anderson and Mr. Grayum:

Enclosed is the finalized summary fisheries document of the parties for 2012-13 management year that represents the results of negotiations between the Washington Department of Fish and Wildlife and the Northwest treaty tribes during the North of Falcon and Pacific Fisheries Management Council (PFMC) pre-season planning forums. This document contains summaries of agreed fishing arrangements for treaty and non-treaty salmon fisheries in the ocean north of Cape Falcon, Oregon and in Puget Sound. Further details, including stock-by-stock management objectives, may be found in the Puget Sound Chinook Harvest Management Plan approved by the National Marine Fisheries Service (NMFS) under the Endangered Species Act (ESA), in the respective parties' regulation summaries, in Status Report documents (as required by the Puget Sound Salmon Management Plan), and other state-tribal understandings.

The fishing arrangements contained in this document are based on pre-season expectations of stock abundance and, in some instances, may be modified on the basis of information obtained in-season and by agreement between the parties. If any changes to the assumptions used to develop these fishing arrangements should occur that would significantly affect the achievement of the parties' agreed management objectives, the parties agree to meet to consider the need to make necessary changes to these fisheries. The agreed upon fisheries document includes non-treaty commercial and recreational fisheries, treaty commercial, and treaty ceremonial and subsistence fisheries. Individual treaty tribes may conduct additional ceremonial and subsistence fisheries not detailed in this agreement, consistent with provisions of the Puget Sound Salmon Management Plan. This document does not specifically address steelhead fishing plans.

Final Fishery Regulation Analysis Model (FRAM) model run summary tables appended to the agreed upon fisheries document provide our assessment of impacts on key natural coho and Chinook salmon populations.

Final fishing plans for some Nooksack River treaty net fisheries remain unresolved at this time and are noted by bolded language within brackets. Tribal managers will continue to work on resolution of this issue.

Detailed descriptions of the management intent and descriptions of monitoring, sampling and enforcement activities for conducting Chinook mark selective sport fisheries in Puget Sound during the 2012-2013 management year are also included and are a part of this fisheries agreement.

Sincerely,

Pat Pattillo

If in-season the Chinook by-catch in this fishery exceeds 1,300, the Tribes will consider management actions to limit the Chinook by-catch, such as time or area restrictions, while continuing the priority objective of harvesting sockeye salmon. If in-season the fishery is projected to result in a total Chinook by-catch exceeding 3,300 Chinook, the Tribes
